PROFESSIONAL SUMMARY

Software Engineering student at Riphah International University with hands-on experience in full-stack web development, cross-platform mobile app development (Flutter/Dart), and backend systems. Proficient in C++, Python, Java, JavaScript, and Dart, with a strong foundation in Data Structures, Object-Oriented Programming (OOP), and Software Architecture. Skilled in building scalable mobile/web applications, RESTful APIs, and interactive tools

PROFESSIONAL EXPERIENCE

Backend Developer Intern

CodeAlpha

Jul 2026 – Aug 2026 | Remote

Designed and deployed scalable RESTful APIs using Node.js and Express.js for web application backends. Modeled, queried, and optimized MongoDB databases to improve data retrieval efficiency and reliability. Implemented server-side business logic, request-processing middleware, and authentication workflows. Collaborated with frontend engineers to integrate API endpoints and streamline deployment workflows.

Software Engineer Intern

Softech Digital Group

Oct 2025 – Dec 2025 | Remote

Developed responsive frontend components for the "Fit Kro" fitness application using React.js. Designed end-to-end Figma prototypes and user flows for "Style Sathi" with modern UI/UX principles

EDUCATION

Bachelor of Software Engineering

Riphah International University

Oct 2022 – Present | Lahore

Intermediate in Computer Science (ICS)

Punjab College Zafarwal

2020 – 2022 | Zafarwal

SKILLS

C++

Python

JavaScript

Dart

HTML5

React

Flutter

Node.js

Spring Boot

Express.js

Java

C#

MongoDB

MySQL

Docker

Git

GitHub

Figma

Adobe Photoshop

Data Structure & Algorithms

Object Oriented Programming

RESTful APIs

System Design

Software Testing

PROJECTS

SyncStay Mobile App

Jun 2026

Built a cross-platform mobile app featuring hostel matching, requests, role-based dashboards, and payment flows

Technologies: Flutter, Dart

<https://github.com/1dpthr/SyncStay-Mobile>

SyncStay Backend

Jun 2026

Developed a microservice backend using Spring Boot, MySQL, and Docker following MVC architecture

Technologies: Java, Spring Boot, Docker
<https://github.com/1dpthr/SyncStay-SCD>

ILM Dost - Ai Learning Platform

Jun 2026

Engineered a privacy-first AI learning tool featuring progress tracking, automated scheduling, and voice assistance

<https://github.com/1dpthr/ILM-Dost>

Air Drawing Platform

Jun 2026

Created a real-time gesture-based drawing application using MediaPipe, computer vision, and shape correction

Technologies: Python, OpenCV

<https://github.com/1dpthr/Ai-Based-Air-Drawing>

Traffic Racer

Jun 2026

Developed a 3D racing game featuring dynamic traffic systems, interactive garage management, and scoring logic

Technologies: Unity 3D, C#

<https://github.com/1dpthr/Traffic-Racer>
